

Eonis

The precision healthcare specialists need

BARCO

Visibly yours

Eonis

Barco is a trusted brand in the world's most innovative hospitals. Over 500,000 Barco displays help radiologists, surgeons, clinicians and scientists produce accurate diagnoses, suggest the best treatment plans and perform successful procedures.

The quality that Barco is renowned for is now available to specialists across the hospital – and beyond. Fully certified for medical environments, Barco's Eonis perfectly blends superior image quality with easy asset management.

for ultimate image quality

for ultimate cleanliness,
equipped with a sealed front cover

Controlled, excellent image quality

Eonis ensures sharp, bright images with high contrast and has a wide viewing angle. Its unique front sensor automatically aligns the image from the moment the display is turned on, to ensure all-time image consistency. The coherent image quality makes **collaboration** easy: everyone sees exactly the same images.

Four reasons why you'll love Eonis

Asset management and quality assurance

Eonis comes with Barco's MediCal QA-Web suite. The online platform performs **automated quality assurance** checks, provides detailed reports and makes it easy to centrally manage and configure displays across all hospital locations. At the click of a button.

Fit for clinical environments

Eonis has external power supplies and other features that make it perfectly safe for use in a hospital environment. To help ensure **infection control**, Barco's white Eonis is rated IP-32 front and back. It is fully cleanable with 70% alcohol-based cleaning agents – a first in the market. Moreover, the VESA mount allows using the display on arms, walls, carts, etc., wherever the specialist needs it.

Built on the expertise of a global market leader

With over 500,000 medical displays in leading healthcare facilities worldwide, Barco is a trusted name in hospital environments. Using Barco's Eonis displays will instill **confidence** in clinical specialists, patients and everyone concerned with patient care.

FULLY SEALED

"The display has to show the same images throughout the hospital."

Dr. V.G.A.M de Visscher, Oral and Maxillofacial Surgeon, Leeuwarden Medical Center

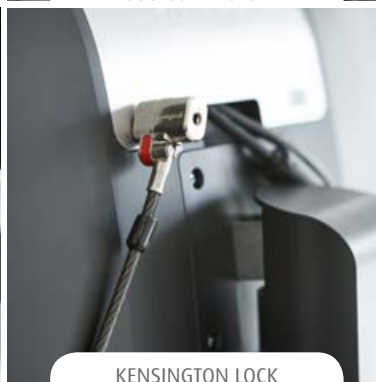

USB CONNECTOR

"MediCal QAWeb helps us save a lot of precious time and resources, while providing complete confidence."

Dr. Andreas Fuhrmann, Head of Dental and Oral Medicine, Radiology Department, University Hospital Hamburg-Eppendorf

UNIQUE FRONT SENSOR

KENSINGTON LOCK

ALL CONTROLS AT HAND

MULTIPLE CONNECTION OPTIONS

"Medical equipment surfaces can contribute to the spread of healthcare-associated infections and should therefore be disinfected."

Guideline for Disinfection and Sterilization in Healthcare Facilities, CDC, 2008
